FLKK AD 2.20 LOCAL AERODROME REGULATIONS

FLKK AD 2.20.1 Airport regulations

At Kenneth Kaunda International Airport a number of local regulations apply. These are:-

- Information about aircraft stands including visual docking guidance systems;
- Information about taxiing from aircraft stands including taxi clearance;
- Marshaller assistance
- Use of engine power exceeding idle power;
- Engine start-up and use of APU
- Fuel spillage; and
- Precautions during extreme weather conditions.

Marshaller assistance can be requested and further information about the regulations can be obtained from the Airport Manager or Surface Movement Control (SMC).

When local regulation is of importance for the safe operation of the aircraft on the apron, the information may be given by Airport Manager "Local Regulations" may be requested in writing from

Airport Manager
Kenneth Kaunda International Airport
P.O Box 30175
Lusaka 10101

FLKK AD 2.20.2 Taxiing

Arriving aircraft will be allocated a stand number by the TWR. General aviation aircraft will have to use the general aviation parking area.

Departing IFR flights shall contact the Kenneth Kaunda TWR to obtain ATC clearance before commencing taxiing. Request for ATC clearance may take place at the earliest 10 minutes prior to engine start-up and Frequency 118.10 MHz shall be used.

Departing aircraft shall obtain taxi instruction from Kenneth Kaunda TWR.

FLKK AD 2.20.3 Parking area for small aircraft (general Aviation)

General aviation aircraft shall be guided by marshallers to the parking area for small aircraft.

FLKK AD 2.20.4 Parking area for helicopters

Helicopters will be guided by a marshaller or TWR on the stand.

FLKK AD 2.20.5 Apron — taxiing during winter conditions

Taxiways in the apron area are not equipped with centre line lights. Taxiway centre line markings, are visible all the time.

FLKK AD 2.20.6 Taxiing — limitations

Tight turning angle onto exit Gate B from stands 4 and 6 to taxiway Delta for heavy aircraft. Taxiing information will be given to each aircraft from the TWR.

FLKK AD 2.20.7 School and training flights - Technical test flights — use of runways

School and training flights may only be made after permission has been obtained from ATS. Permission will only be granted for such flights subject to departing and arriving traffic density.

FLKK AD 2.20.8 Helicopter traffic — limitation

Non-scheduled public air traffic with helicopters is permitted only after approval from the Lusaka ATSU. Any contact concerning the above shall be made via the handling company or directly to the Airport Manager during the hours of service and, if possible, not later than the day before the flights is to be carried out.

Any request for approval of traffic shall contain the following information:

- a. Owner/operator
- b. Type of helicopter, registration/call sign
- c. Date, arrival time/departure time, destination(s)
- d. Requested altitude
- e. ATS route used
- f. ATS serviceable communication

FLKK AD 2.20.9 Removal of disabled aircraft from runways

When an aircraft is disabled on the runway, it is the duty of the owner or user of such aircraft to have it removed as soon as possible after prior approval from Director General of Civil Aviation Authority. If a disabled aircraft is not removed as quickly as possible by the owner or user, the aircraft will be removed by the aerodrome authority or at the owner's or user's expense.

FLKK AD 2.21 NOISE ABATEMENT PROCEDURES

TO BE DEVELOPED.

FLKK AD 2.22 FLIGHT PROCEDURES

FLKK AD 2.22.1 General

All flights within Lusaka FIR at or below FL150 within and outside controlled airspace shall be operated in accordance with instrument/visual flight rules.

Flights above FL150 within and outside controlled airspace shall be operated in accordance with instrument flight rules only.

Unless permission has been obtained from an ATC unit, all flights within the Lusaka FIR shall be conducted within and in accordance with established ATS routes.

FLKK AD 2.22.2 Procedures for flights within Lusaka UTA

The inbound, transit and outbound routes shown on charts may be varied at the discretion of ACC. En-route clearance shall be given under the conditions described below.

- a.

A flight plan shall be submitted for the flight concerned

- b. En-route clearance shall be obtained from Lusaka ACC
- c. Deviation from the en-route clearance may be made when prior permission has been obtained
- d. Two-way radio contact shall be established with ACC before the flight takes place in the UTA
- e. Two-way radio communication shall be maintained with ACC or nearest ATS Unit on the frequency prescribed
- f. Position reports shall be submitted in accordance with 3.6.3 of ICAO Annex 2
- g. The pilot —in- command shall be the holder of an International VHF licence.

FLKK AD 2.22.3 Procedures for IFR flights

The inbound transit and outbound routes shown on charts may be varied at the discretion of ATS. If necessary, in the case of congestion, inbound aircraft may also be instructed to hold at one of the designated airways, reporting points.

FLKK AD 2.22.4 Radar procedures within Lusaka TMA and CTR

Normally, aircraft will be vectored and sequenced from a circle 50NM radius centered at VLS VOR/DME to the appropriate final approach track (ILS. Locator, VOR/DME), so as to ensure an expeditious flow of traffic. Radar vectors and flight levels/altitudes will be issued as required, for spacing and separating aircraft so that the correct landing intervals are maintained, taking into account aircraft characteristics.

Radar vectoring charts are not published since the instrument approach procedures and altitude ensure that adequate terrain clearance exists at all times until the point where the pilot will resume navigation on final approach or circuit it.

FLKK AD 2.22.5 Surveillance Radar Approaches

NIL

FLKK AD 2.22.6 Communication failure

In the event of communication failure, the pilot shall act in accordance with the communication failure procedures in ICAO Annex 2.

Flights departing from unmanned aerodromes within the TMA and CTR shall obtain en-route ATC clearance from Lusaka Approach control or Lusaka ACC immediately before leaving the aerodrome traffic zone.

FLKK AD 2.22.7 Procedures for VFR flights within Lusaka TMA and CTR

Provided that the VFR conditions shall so permit, ATC clearance for VFR flights will be given under the conditions described below.

1. flight plan . Containing items 7 to 18 and shall be submitted.
2. ATC clearance shall be obtained 5 minutes before the aircraft enters the Control Zone or Control Area.
3. Position reports shall be submitted in accordance with 3.6.3 of ICAO Annex 2.
4. Deviation from the ATC clearance may only be made when prior permission has been obtained or under emergency situation
5. The flight shall be conducted with vertical visual reference to the ground unless the flight can be conducted in accordance with the Instrument Flight Rules.
6. Two-way radio communication shall be maintained on the frequency prescribed. Information about the appropriate frequency can be obtained from Lusaka Approach.
7. The pilot-in-command shall be the the holder of an International VHF Licence.

NOTE: ATC clearance is intended only to provide separation between IFR and VFR flights

FLKK AD 2.23 ADDITIONAL INFORMATION

FLKK AD 2.23.1 Bird concentrations in the vicinity of the airport

Migratory birds are usually present at the aerodrome from late October to April during the country's wet season. Cattle egrets cross the approach path of runway 10 at less than 5000 feet between 15:00 UTC and 18:00 UTC almost all year round. During the above periods pilots of aircraft are advised where the design limitations of aircraft installation permit, to operate landing lights in flight, within the terminal area and during take-off, approach-to-land and climb and descent procedures.

As far as practicable, Aerodrome Control will inform pilots of this bird activity and the estimated heights AGL. As a control measure, runway sweeps are conducted daily before landing and takeoff on aircrafts.

The aircraft engine noise is not always effective in the clearing of these birds from the landing area, pilots should exercise extreme caution. Prominent birds around the airport are as tabulated below.

SPECIES	STATUS
Lapwing	Resident
Lark	Resident
Night Jar	Migrant
Swallows	Migrant
Guinea Fowl	Resident
Black Bellied Bustard	Resident
Kites	Migrant
Pied Crow	Resident
Heron	Possible migrant
Ban Swallow	Migrant/Resident
Abdim's Storks	Migrant
Owls	Resident
Cattle Egret	Migrant/Resident

FLKK AD 2.23.2 Local Flying Restrictions

Only aircraft equipped with serviceable VHF radio will be accepted at this airport.

Aircraft flying in Lusaka circuit are restricted to maximum altitude of 5000FT on Lusaka QNH. Circuit traffic on the right hand traffic pattern to remain north of the Great East Road and clear of Airforce Base.

Blasting operations on the right hand at 152200S 0282500E. Monday to Friday between 1200 and 1430 UTC.
